Summary

I am enthusiastic software developer with two years experience in backend development at outsource company Progmatic Lab, where I contributed in six projects, but main ones were Juniper, Tungsten Fabric and VK.
Problem solving at the intersection of mathematics and programming is vital to me, I need brain gums to stay motivated.
I desire to write beautiful elegant low-level C code with all the Spartan charms of it.
In my entrepreneurial activity I also acted as website designer and fullstack developer.
I am considering relocation and remote work.

Career objective

I strive for embedded or kernel C development as junior+/middle-.

Employment history

Mar 2020- Feb 2022	Progmatic Lab Support and development for Juniper , Tungsten Fabric , VK , etc. Fixed bugs and developed features in different parts of listed above companies’ projects. Improved CI, deployment scripts and tests, had expirience in some DevOps activities like automatization of OpenVPN server configuration and deployment.
Mar 2022- Sep 2022	Mainly entrepreneurial activity. I have supervised websites’ development and personally developed websites, including glyphs creation and little “hacks” of website constructors

Hard skills

Cloud Providers	AWS, Openstack-based providers
Virtualization	KVM, VirtualBox
Containerization	Docker, Podman
Config management	Ansible, Juju
Cloud Computing	Openstack, RHOSP
Orchestration	k8s, OpenShift
Networks&Security	TCP/IP, VPN [OpenVPN server], OpenSSL certs [creating and applying]
Languages	sh, bash, Python 2&3, PL/SQL [mainly for PostgreSQL], Go, JS, ANSI C, C++, x86 asm [XORPD lvl], q/k for KDB+

Soft skills

Empathic	Caring, reflective.
Communicative	Active listener, developed emotional intelligence.
Creative	I feel delight after finding non-trivial solution for a problem.
Able to manage	I had to replace project manager periodically in some cases, also I have experience working with subordinates in my entrepreneurial activity.
Problem solving	Solved 572’nd problem in project Euler, my non-distributed solution calculated the answer in ~100ms.

Education

2017-2020	MIEM HSE [Moscow, Russia] applied mathematics and computer science
-----------	---

Not about work

I like to understand complex things and coming up with extraordinary solutions.
Doing sports like indoor bouldering and running.
I will be glad if one of my prospective colleagues likes climbing, especially indoor bouldering.

Languages

English	upper-intermediate
